Recommendations (optional): In this section, provide recommendations related to controls and/or compliance needs that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

1. Strengthen access controls by implementing least privilege and separation of duties so that only authorized employees can access sensitive customer, payment, and PII/SPII data.
2. Protect sensitive data by implementing encryption for customer and cardholder information, strengthening the existing password policy, and introducing a centralized password management system.
3. Improve business continuity by establishing regular backups of critical data and creating a disaster recovery plan.
4. Improve security monitoring by deploying an intrusion detection system (IDS) and defining a regular schedule for monitoring and maintaining legacy systems.
5. Prioritize PCI DSS and privacy compliance by securing payment-card data, restricting access, and maintaining proper data classification and inventory practices.
